Education

Gujarat Technological University **July 2023 – June 2027**
Bachelor in Computer Engineering *Surat, Gujarat*

Relevant Coursework

- Data Structures
- Python for *Data* Science
- *Web Development*

Projects

ToDo App | HTML, CSS, JavaScript **August 2025**

- Developed a dynamic ToDo application using HTML, CSS, and JavaScript to manage daily tasks.
- Implemented core functionalities, including adding, deleting, and marking tasks as complete, with a user-friendly interface.
- Engineered responsive design principles using CSS to ensure the app is accessible on various devices and screen sizes.
- Leveraged JavaScript to handle user interactions and manage task data, providing a smooth and intuitive user experience.
- Utilized local storage to persist tasks, ensuring data remains available across browser session.

Tic-Tac-Toe Game | HTML, CSS, JavaScript **August 2025**

- Engineered an interactive Tic-Tac-Toe game using a foundational web development stack: HTML, CSS, and JavaScript.
- Designed a clean and intuitive user interface with HTML and CSS to display the game board and game status.
- Implemented core game logic in JavaScript to handle player turns, check for win conditions (rows, columns, diagonals), and manage game state.
- Incorporated event listeners to enable a responsive, click-based user experience for placing markers on the board.
- Developed a reset feature to allow for new games, enhancing user engagement and replayability.

A great API-based project that's perfect for a portfolio is a Weather App. It's a classic and allows you to demonstrate your ability to fetch and display data from an external source. Here's a description in the same format:

Weather App | HTML, CSS, JavaScript, OpenWeather API **August 2025**

- Developed a responsive weather application to display real-time weather data for any city.
- Integrated the OpenWeather API to fetch and parse weather information, including temperature, humidity, and wind speed.
- Designed a clean and intuitive user interface using HTML and CSS for a seamless user experience.
- Implemented asynchronous JavaScript functions with the fetch API to handle data retrieval and dynamic content updates.
- Included a user input field with error handling for invalid city names, ensuring a robust and reliable application.

Technical Skills

Languages: C, C++, JavaScript, TypeScript, Python
Developer Tools: VS Code, Cursor
Technologies/Frameworks: Linux, Git, GitHub, Pandas

Leadership / Extracurricular

Tech-Fest Event Organizer, DGGEC Surat **February 2025**
UI2UX2DESIEGN *Surat, Gujarat*

- Designed and prototyped intuitive user interfaces using Figma/Canva.
- Conducted user research and usability testing to improve navigation flow.
- Created wireframes and mockups ensuring responsive and accessible design.
- Improved overall user experience by focusing on simplicity and efficiency.
- Soft Skills: Teamwork, Time Management, Leadership, Problem-solving.
